To
Whomsoever it may concern

This is to certify that "Grundfos" make vertical, inline, multistage, centrifugal pumps of CR series with PTFE shaft seals & FLP motors supplied by HARSH ENGINEERING for using as process pumps for the Chloro benzene mixtures at various heads & flow rates.

These pumps are working OK without any maintenance & leakage since last 18 months.

Moreover as compared to earlier ordinary centrifugal pumps, we are saving power cost by more than 75%, which has resulted in to payback period of less than 10 months, without considering saving for the spares & material loss due to seal / gland leakage.
